

Please do not make any changes to the New Jersey do-not-call laws. As a private citizen, I pay for a telephone for the convenience of being able to call people I choose to call. I do not want to be disturbed by callers trying to sell me something that I normally do not need or want. I try to maintain my privacy by having an unlisted telephone number. I only give the telephone number to people or organizations I want to call or have call me. I do not care about those people who say it is their right to call me to try to sell me something that I do not want. Perhaps, if they want to subsidize my telephone costs I might think differently. In any case, PLEASE do not turn these people loose again to disturb my evening or day time hours. I think the New Jersey statutes provide proper protection from these insensitive people and I do not want to see that change.
